

## Lubbock Power & Light Construction Notice: Chalker Transmission Line Upgrades

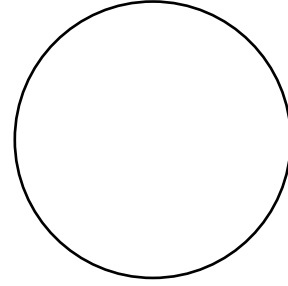

Lubbock Power & Light is committed to investing in the reliability and capacity of Lubbock’s electrical system for our customers. As part of our ongoing infrastructure improvement program, we will be working in your neighborhood to upgrade select sections of existing transmission lines.

Our work will include underground drilling, pouring concrete, placing new steel poles, reconductoring, and transferring of distribution conductors.

In order to help ensure our work is performed as quickly and safely as possible, please be aware of the following:

- We will work to ensure access to parking will not be unnecessarily restricted. Keeping construction area entrances clear when parking personal vehicles will allow our crews to complete work with minimal delay.
- If access to certain portions of roadway is restricted, alternate routes will be provided.
- Staying clear of marked construction areas will keep workers and citizens safe.

**We anticipate all work will be completed within \_\_\_\_\_ day(s).**
