### **POWER COST RECOVERY FACTOR:**

The Power Cost Recovery Factor (PCRf), provides for the recovery of all power costs incurred by LP&L in serving system demand and energy requirements. The PCRf shall be reviewed and may be adjusted by the Director of Electric Utilities at a minimum of two times per year, once during the non-summer season of October through May and once during the summer season of June through September. The PCRf will have a demand (PCRf-D) and energy (PCRf-E) component or rate. The PCRf rates shall be established with the intention of matching PCRf revenues with actual power costs over the course of a fiscal year, giving consideration to seasonal fluctuations in load and in power prices. The PCRf may be adjusted more frequently if any over or under recovery exceeds the maximum variance as defined below.

For a particular customer class, the PCRf-E shall be adjusted by the following voltage level factors:

Primary Voltage: 1.0409

Secondary Voltage: 1.06340

On a monthly basis, LP&L shall track actual revenues collected from the PCRf and compare these revenues to actual total power costs incurred. The cumulative balance representing the difference between total PCRf revenues collected less total power costs incurred over the period shall be reported to the LP&L Board on a monthly basis.

A PCRf balancing account will be established with a cap equal to five percent of total annual budgeted or forecasted power costs to manage the monthly over/under collection of, or differences in, the monthly PCRf revenues and monthly power costs. If at any time, the reported cumulative balance of the difference between total PCRf revenues collected and power costs is greater than the PCRf balancing account cap, an adjustment may be made to the PCRf rates with the intention of refunding the over recovery amount. In addition, if at any time the reported cumulative balance of the difference between total PCRf revenues collected and power costs is approaching or less than zero, an adjustment may be made to the PCRf rates with the intention of replenishing the PCRf stabilization fund.

All mid-season adjustments to the PCRf shall be approved by the Electric Utility Board.
