

## Lubbock Power & Light Load Interconnection Inquiry Form:

### How to use the form for Interconnections

## Fill out the general information box

- Project name is the name of the project.
- Contact name is the primary contact in relation to the project.
- Phone number should connect to the person listed as the primary contact from above.
- Project address is the proposed project location. Please provide an address (or approximate address).
- Email is the primary contact's email address.
- Project size (MW) refers to the peak expected power draw size of the project.

## Helpful information for the rest of the form

1. Please provide the interconnection voltage in volts or kV (Kilovolts).
2. Please provide an expected timeline for the project including initial ground-breaking and estimated production load date.
3. Please let us know how much growth is expected for the project within the first 5 years.
4. The nature of the project can be something like, but not necessarily limited, to the following:
  - a. Commercial Load.
  - b. Industrial Load.
  - c. Critical Infrastructure (As defined by **Texas Government Code Ch. 421 Sec. 421.001**).
5. Special project requirements are anything unique about the project requirements that are not outlined in the form but that should be noted for an interconnection study.
6. Other information is any additional information that is helpful to know in characterizing the project. Examples include, but are not limited to the following:
  - a. Other addresses of interest.
  - b. Specific coordinates relating to the project.
  - c. Special forms or agreements that are already in place between interested parties.
  - d. Has Onsite Cogeneration.
